Response dated December 7, 2005  
Reply to Office Action of October 7, 2005

Attorney Docket No. PF01874NA C01

**Amendments to the Claims:**

1. through 8. (Canceled)

9. (Currently Amended) An apparatus comprising:

an electronic lock box corresponding to a real estate property having a wireless communication system embedded therein wirelessly communicating information about the real estate property and controlling access to the real estate property, the wireless communication system being capable of transmitting the information to a remote device in response to receiving a query for the information from the remote device,

wherein the information about the real estate property includes at least one of selected from the group comprising a price of the real estate property, a square footage of the real estate property, a virtual tour of the real estate property, a number of bedrooms within the real estate property and an availability of the real estate property.

10. (Original) The apparatus as claimed in claim 9, wherein said electronic lock box is hermetically sealed.

11. (Original) The apparatus as claimed in claim 9, wherein the electronic lock box is capable of receiving requests and transmitting information about the real estate property to a transmitting/receiving device located within a predetermined proximity of the electronic lock box.

12. and 13.(Canceled)

Attorney Docket No. PF01874NA C01

14. (Original) The apparatus as claimed in claim 9, wherein the electronic lock box is capable of holding at least one key therein.

15. (Previously Presented) The apparatus as claimed in claim 11, wherein the transmitting/receiving device is one of a client configured device and a controlling agent device, the client configured device capable of requesting information about the real estate property from the electronic lock box, transmitting queries about the real estate property to the electronic lock box, transmitting client information to the electronic lock box, transmitting client information to a remote real estate office via the electronic lock box, viewing information received from the electronic lock box or recording voice or text messages in the electronic lock box.

16. (Previously Presented) The apparatus as claimed in claim 15, wherein the controlling agent device is capable of performing all client configured device functions and is further capable of at least enabling, programming and disabling the electronic lock box, overriding access restrictions of the electronic lock box, viewing information stored by the electronic lock box, downloading information stored by the electronic lock box, interacting with other premises electronic equipment, and maintaining the electronic lock box.

17. (Original) The apparatus as claimed in claim 9, wherein the electronic lock box comprises at least one of the group consisting of a memory, a proximity device reader, a display, a clock and an alarm.
